We are very concerned with public safety and test only with the most conservative methods. We realize that our customers have come to expect immaculate optics from Bushnell and be assured that we are working toward that goal. This was accomplished not by increasing the output power both the 400 and 800 output the exact same amount of laser power. The spots in no way affect the ranging performance of the device. Can I use my rangefinder on a course that doesn't have reflectors on the pins? <http://ceibsmobi.com/UploadFiles/dell-laptop-repair-manual-pdf.xml>

**UNIT OF MEASURE OPTIONS**

The BUSHNELL YARDAGE PRO can be used to measure distances in yards or meters. The unit of measure indicators are located in the lower right portion of the LCD. To select between yards and meters, look through the monocular, depress the "mode" button and hold it down for approximately 5 seconds. If you are changing from yards to meters, a change in unit of measure will be indicated by the illumination of the METER indicator while the YARD indicator is turned off. If you are changing from meters to yards, the opposite will occur. Note: The BUSHNELL YARDAGE PRO will return to the last setting used, each time the unit is turned on.

**TARGETING MODES**

**Standard (LCD Indicator - "mode")** This setting allows most targets to be distanced up to 700 yards. Used for moderately reflective targets that are typical of most distancing situations. The minimum distance in the standard mode is 20 yards.

**SCAN (LCD Indicator - "SCAN")** This mode allows the range to be continuously updated for 10 seconds when the fire button remains depressed. It can be used to scan an area containing several objects or a single object that is moving. NOTE: Objects further away require a slower scanning pace than objects a closer distance. The minimum distance in this mode is the same as in the standard mode.

To select between these modes, while looking through the monocular, depress and release the mode button. Each successive depression of the mode button will activate a different mode designation in the following order: 1) Standard (no indicator), 2) Scan ("SCAN"). NOTE: The BUSHNELL YARDAGE PRO will return to the last setting used, each time the unit is turned on.

**ILLUMINATING INDICATORS**

**ACTIVE LASER (LCD Indicator - "LASER")** - Located in the upper left portion of the LCD. When illuminated, indicates that energy pulses are being emitted from unit.

**TARGET QUALITY GAUGE (LCD Indicator - "TARGET QUALITY")** - Located in the upper middle portion of the LCD. Gauge indicating amount of energy pulses being reflected back from the target. Gauge is calibrated to fill squares from left to right. The higher the number of returning energy pulses, the greater the number of squares that will fill with illumination. This gauge can be used to scan across a target that is difficult to acquire to find the most reflective point for ranging (see Trouble Shooting Table).

**PRECISION PARAMETER INDICATOR (LCD Indicator - "PRECISION")** - When illuminated, indicates the distance measurement is within plus or minus 1 yard or meter. If it is not illuminated after obtaining a measurement, the distance measurement is within plus or minus 3 yards or meters.

**LOW BATTERY CHARGE (LCD Indicator - "BATT")** - When illuminated, indicates the battery charge is low and battery should be replaced with a 9-volt alkaline battery.

**SPECIFICATIONS**

**OPTICAL DESIGN**

The BUSHNELL YARDAGE PRO features a Perma Focus™ monocular optical system for viewing your target. A liquid crystal display (LCD) is mounted within the optical system and when activated, displays a reticle for targeting, yard / meter and mode designations, a target quality gauge, as well as precision and low

(Continued on page 2)

**INSTRUCTION MANUAL**  
 L.C. # 98-0030/04-02

Your BUSHNELL YARDAGE PRO is a precision instrument designed to provide many years of enjoyment. This booklet will help you achieve optimum performance by explaining its adjustments and features as well as how to care for this precise laser ranging instrument. To ensure optimal performance and longevity, please read these instructions before using your BUSHNELL YARDAGE PRO.

**INTRODUCTION**  
 The BUSHNELL YARDAGE PRO emits invisible, eyesafe, infrared energy pulses. Sophisticated circuitry and a high-speed clock are used to instantaneously calculate distances, by measuring the time it takes for each pulse to travel from the rangefinder, to the target, and back.

The ranging accuracy of the BUSHNELL YARDAGE PRO is plus or minus one yard / meter under most circumstances. The maximum range of the instrument depends on the reflectivity of the target. The maximum distance for most objects is 700 yards / 640 meters while for highly reflective objects the maximum is 999 yards / 913 meters. Note: You will get both longer and shorter maximum distances depending on the reflective properties of the particular target and the environmental conditions at the time the object is being distanced to.

The color, surface finish, size and shape of the target all affect reflectivity and range. The brighter the color, the longer the range. Red is highly reflective, for example, and allows longer ranges than the color black, which is the least reflective color. A shiny finish provides more range than a dull one. A small target is more difficult to range than a larger target. The angle to the target also has an effect. Shooting to a target at a 90 degree angle (where the target surface is perpendicular to the flight path of the emitted energy pulses) provides good range while a steep angle on the other hand, provides limited ranging. In addition, lighting conditions (e.g. the amount of sunlight) will affect the ranging capabilities of the unit. The less light (e.g. overcast skies) the farther the unit's maximum range will be. Conversely, very sunny days will decrease the unit's maximum range.

**OPERATIONAL SUMMARY**  
 While looking through the monocular, depress the power button once to activate the view display system (LCD). Aim the BUSHNELL YARDAGE PRO at a target at least 20 yards away, depress and hold the power button down until range reading is displayed. Release the power button. Note: Once activated, the BUSHNELL YARDAGE PRO's LCD will remain active and display the last distance measurement for 30 seconds. You can depress the power button again at any time to distance to a new target. As with any laser device, it is not recommended to directly view the emissions for long periods of time with magnified lenses.

**FEATURES**  
 The BUSHNELL YARDAGE PRO's sophisticated circuitry allows you to select between various units of measure and targeting modes. In addition, your BUSHNELL YARDAGE PRO's LCD incorporates illuminated indicators that advise you when the laser is active, what the quality level is (measure of reflectivity) of the target is, what the precision tolerances of a specific measurement are and when the battery charge is low. A summary of these features is presented below:

If you have any questions, feel free to contact us for a prompt and friendly response. What type of battery do the Yardage Pros use. How long will a battery last. <http://dj-jhonny.com/images/bostitch-sx150-stapler-manual.pdf>

The rangefinder is made of durable black plastic with a rubberized gripping area, making it easy to hold. To measure a distance, simply put one eye up to the monocular, aim at a target, press and release the fire button on top of the instrument, and wait for the reading to be displayed inside on the LCD. Your target must be at least 21 yards away or you will get no reading. There are five different targeting modes easily set by pressing a mode button also located on top of the rangefinder. The five modes are 1 standard, for normal conditions; 2 scan, for moving targets; 3 reflective, for highly reflective targets; 4 rain, for readings during inclement weather; and 5 zip thru, exclusively for targets more than 115 yards away. Most of the time you will probably just want to use the standard setting. Infrared energy pulses are emitted from the Yardage Pro 600 when the fire button is pressed. A high-speed clock measures the time it takes the energy pulses to travel from the rangefinder to the target and back. Using this information, sophisticated circuitry inside the unit instantaneously calculates the distance to the target. The infrared energy pulses are eye safe. The color, surface finish, size and shape of the target all affect reflectivity and range. Brighter colors like red or shinier surfaces on targets allow for a greater range. Lighting conditions and angle to the target can also affect the range. The Yardage Pro 600 can be set to measure distances in yards or meters. The internal display gives you the distance measurement, indicates when the battery is low, and even rates the quality or reflective level of the target, which helps you decide when to switch targeting modes. It uses a 9-volt alkaline battery (not included). A sporty, form-fitting neoprene case with a shoulder strap is included in the box. To calculate the overall star rating and percentage breakdown by star, we don't use a simple average.

Instead, our system considers things like how recent a review is and if the reviewer bought the item on Amazon. It also analyzes reviews to verify trustworthiness. Please try again later. Phillip Loughlin 4.0 out of 5 stars Bowhunters, black powder shooters, and others who aren't looking to really extend their viewing range will benefit from the clean display and ease of use. The 600 yard range proves a limitation for folks looking to work in big territory, such as open country big game hunters or sailors. There is another rangefinder from Bushnell, the Pro1000, which is a better choice for these users. All in all, the one I tried was pretty nice. A neat gadget for the hunting pack. Compare your ammunition's data with the curves in the instruction manual and select the appropriate one. Back in 1998 I got my first one, a Bushnell Yardage Pro Compact 600. So I sent my lovely bride back out to Cabela's with instructions to buy this package deal. How do I fix this? Take the nice cover and neck strap off rangefinder to use on another item. Next use the. Parts are not available. You will have to upgrade technology. pinseeker technology hint, hint! Mine broke too. Called Bushnell Customer Service and they sent me one. Bushnell will not have parts to repair it. They will. Let me know if that. Bushnell doesn't repair these anymore. Go to bushnell.com and find a unit that you like. Call 800.423.3537 and they will offer you 30-40% off on a new one. What I have to do for this you will need to send the unit into their repair at 8500 Marshall Drive Lenexa KS 66214. 4-6 week turnaround and put your name, address and telephone. Answer questions, earn points and help others. Login to post. There will be no user serviceable parts. I trust the optics are clean, and there is no condensation inside the optics. The unit is no longer in production. Bushnell Service Support. Bushnell will not have parts to repair it. They will offer you one at a discount. Call them at 800 4233537. I took the battery out between uses and that avoided the problem. I also made sure that the case was tightly closed so no light gets into it when not in use. The problem is now gone. Next use the rangefinder for hammer. Answer questions, earn points and help others. Free Ground Shipping. Our focus first and foremost is on keeping our employees safe, but we also are working to maintain operations and business execution for our customers, end consumers and employees. As we move ahead, Bushnell Golf will continue to provide a healthy environment for our employees and the entire organization is following guidance issued by federal, state and local health authorities.

[aokman-gearbox.com/d/files/concierge-training-manual.pdf](http://aokman-gearbox.com/d/files/concierge-training-manual.pdf)

What should I do? Release the buttons, and the watch will reboot. To reset a Bushnell Golf handheld GPS device, such as the Phantom or Hybrid, press and hold the down button and then press the power button once. The screen will power off and you can release both buttons. How do I register my device? Use the up or down button to highlight and select OFF then press the select button to confirm setting. If the AutoOff function is enabled, your device will automatically power down after 30 minutes without any button presses. Can it be replaced? Although, all rechargeable, lithium ion batteries have degradation, so over time the battery will wear down like you have noted in your email. The batteries in our GPS products are not replaceable. They are available MF from 8am to 5pm CST. After 7 seconds, the display will begin to cycle through the options Yards or Meters. If you are changing from meters to yards, the opposite will occur. The TOUR V4 will return to the last unit of measure setting used each time the unit is turned on. They are available MF from 8am to 5pm CST. How do I turn my GPS device on and off? This can happen if this is the first time it is being used in several months or maybe had been sitting on a store shelf for a few months. Plug the GPS into a power source to charge and press the power button on the watch lower right button. The screen should come up and the unit will resume normal operation. If you have already registered, you will need to log into your account. If an update is necessary, you will be prompted once you've logged on to download. The website will walk you through these updates step by step. These are a natural characteristic of the LCD and cannot be fully eliminated in the manufacturing process. They do not affect the distancing performance of the unit. Because the charging contacts on the watch are against your skin when it is worn, the contacts can get dirty and simply need to be cleaned.

This can be done by spraying ammonia based glass cleaner such as Windex on to the contacts and then scrubbing with a nylon brush such as a toothbrush. Wipe the contacts with a paper towel and the watch should charge. The watch can't charge while it shows the battery meter, so it needs to be showing its main watch face before it is hooked up to charge. FGB Front Green Bunker 11. RGB Right Green Bunker 12. CRK Creek Layup 20. CRKC Creek Carry 21. EOF End of Fairway Or contact our GPS software partner, iGolf, using the information below to reset your password. Click on the EDIT button to update your account information. The screen will go blank and the reboot process will begin. Doing a hard reset will recalibrate the internal GPS chip and may allow it to bring up courses again. This will need to be addressed by our GPS software partner, iGolf. To confirm that the visual JOLT is working on your unit, try this Laser to an object in the distance something over 100 yards away and while continuing to hold the fire button down, bring the reticle to something closer. This should make the unit JOLT. If you are unable to locate this sticker or if the serial number has been obscured, the product may not be authentic counterfeit or it may not have been purchased through an authorized dealer. In either case, Bushnell will not honor warranties on these products. You should return the unit to the seller for a refund, and purchase your rangefinder from an alternate location. It blends a 5times magnification scope with an LCD viewing screen; the devices illuminated reticle displays targeting, yard, meter and mode information. The Pro 400 is primarily designed for determining range on golf courses. It is also useful for hunting, boating and other outdoor activities.

For most targets, the unit has a maximum measuring range of 400 yards. A target quality bar graph on the LCD displays the relative reflectivity of the target in the scopes field of view; this predicts the accuracy of the ranging result. An estimate of the plus and minus accuracy of the range figure is displayed after the measurement. The Yardage Pro 400 is powered by a single 9volt alkaline battery. It weighs 18 oz. Step 1 Look through the monocular. Step 2 Aim the unit at a target at least 21 yards away. Release the button. The range is displayed for 30 seconds. The range of the previous target is cleared, and the range to the new target is displayed. This causes the unit to toggle between yards and meters. The unit automatically changes from the present unit of measure to the optional unit of measure. It displays the new unit of measure on the LCD. Step 6 Observe the target quality bar graph located at the top center of the LCD when targeting an object. The reflected laser pulses returning from the target create squares on the target quality bar graph. A high reading on the graph indicates a more accurate range measurement figure. If it flies, drives or just sits on your desk and blinks, hes probably fixed it. More Articles Major Parts of an Overhead Projector How Do Glass Scales Work. How to Set the Date on a Casio Watch How to Calibrate the Screen on a LG. As an authorized dealer, you can rest assured that you are purchasing genuine and In addition, you'll If you cannot upgrade your browser or use an alternative device to visit us, Thousands of hunters and golfers, even touring professionals, use the Bushnell Yardage Pro 200600 to quickly and accurately measure distances and improve performance. Using advanced laser technology, the Bushnell Yardage Pro 600 Compact Laser Rangefinder 200600 measures distances instantly and is accurate to within 1 yard. Its as simple as aiming and pressing a button.

Bushnell Yardage Pro 600 Compact Laser Range finder is water and shock resistant, lightweight, compact and rubber armored for durability even under the harshest conditions. Seller added the following. Range; 5 to. more 800 Yards, Realtree Camouflage. Bushnell 4 x 20 Yardage Pro Sport 450 Laser Rangefinder Protective Case Neck Strap Bushnell 2 Year Warranty The Bushnell 4 x 20 Yardage Pro Sport 450 Laser Rangefinder is made to provide many years of useful and enjoyable service to the user. You can rest assured that this instrument will provide quick and accurate measurements up to 450 yards. It is an affordable choice for hunters and golfers. This rangefinder features compact. Slim design and is extremely user friendly. For over 35 years we have been

serving professionals as well as amateurs in the photographic. Video, digital imaging and telescope fields. Ships to 48 United States ONLY Bushnell Yardage Pro Sport is a precision instrument designed to provide many years of enjoyment. This booklet will help you achieve optimum performance by explaining its adjustments and features as well as how to care for this precise laser rangefinding instrument. The Bushnell Yardage Pro Sport is the world's most simple to use. Yet advanced laser rangefinder. Range to a deer or. The single button operation allows outdoor enthusiasts to easily measure distance with confidence. The Yardage Pro Sport emits invisible, eyesafe, infrared energy pulses.

Sophisticated digital technology instantaneously calculates distances by measuring the time it takes for each pulse to travel from the rangefinder, to the target, and back. The maximum range of the instrument depends on the reflectivity of the target. You will get both longer and shorter maximum distances depending on the reflective properties of the particular target and the environmental conditions at the time the distance of an object is being measured. I have really cared for this. There is no damage to the lens. It will come in the original holder. The original cleaning towel, a new battery inside and a new spare and the original instruction book. Works Great! Battery Included. Also included is the BUSHNELL ON TOUR carry case that holds the range finder on golf bag or cart for protection Proceeds to the 1st Tee Junior Golf Program FREE USPS 23 Day Priority shipping with confirmation of delivery in the USA Only It is in great condition and works perfect. Feel free to ask any questions and happy bidding. Posted with This item has not been hunted with. Its only been used to set targets for archery practice. Posted with It is in fantastic condition with no signs of wear it was never even used just taken out of the box and tested once. Using advanced digital technology.
