Book Descriptions:

Colt m1917 manual

Our payment security system encrypts your information during transmission. We don't share your credit card details with thirdparty sellers, and we don't sell your information to others. Please try again. Please try again. In early Colt production revolvers, attempting to fire the .45 ACP without the halfmoon clips was unreliable at best, as the cartridge could slip forward into the cylinder and away from the firing pin. After the First World War, M1917s became popular on the civilian and police market. Created in 1941, this field manual reveals a great deal about the M1917's design and capabilities. Intended as a manual for those charged with operation and maintenance, it details many aspects of the gun assembly, accessories and target exercises. Originally labeled restricted, this manual was declassified long ago and is here reprinted in book form. Care has been taken to preserve the integrity of the text. Then you can start reading Kindle books on your smartphone, tablet, or computer no Kindle device required. In order to navigate out of this carousel please use your heading shortcut key to navigate to the next or previous heading. Register a free business account To calculate the overall star rating and percentage breakdown by star, we don't use a simple average. Instead, our system considers things like how recent a review is and if the reviewer bought the item on Amazon. It also analyzes reviews to verify trustworthiness. Please try again later. Alexander P. 5.0 out of 5 stars Full schematics and photographs are included. The quality of the reproduction is a little fuzzy in some places, but keep in mind the original source material is nearly 100 years old. All in all, its a useful resource for the owners of the M1917 and a historical novelty for any gun collector. It is, I am sure, a reprint, but nicely done. Sorry, we failed to record your vote. Ill do it No thanks M1911 and M1911A1 Colt pistols, M1917 S and W revolver, M1917 and Detective Special Colt revolversM1911 and M1911A1 Colt pistols, M1917 S and W revolver, M1917 and Detective Special Colt revolvers. The interim solution was to ask the two major American producers of revolvers to adapt their heavyframe civilian revolvers to the standard.45 ACP pistol cartridge.The Colt M1917 Revolver was essentially the same as the M1909 with a cylinder bored to take the.45 ACP cartridge and the halfmoon clips to hold the rimless cartridges in position. Newer Colt production could be fired without the halfmoon clips, but the empty cartridge cases had to be ejected with a device such as a cleaning rod or pencil, as the cylinder extractor and ejector would pass over the edge of the rimless cartridges.Some were military surplus. Others were newly manufactured. Smith and Wesson kept their version in production, for civilian and police sales, until they replaced it with their Model 1950 Target.Loading and unloading the clips is tedious but obviates refilling the chamber with single rounds.They are sometimes referred to as the M1937 or the Braziliancontract M1917.Stackpole Books, Harrisburg PA USA, 1979. In the 1920s, when the weapons were being distributed to civilians via weapons dealers, civilians loathed using halfmoon clips for the loading of the M1917 revolvers despite their ease of use, as damaged clips can cushion firing pin strikes and cause ignition problems; the Peters Company came up with the .45 Auto Rim to solve this issue. By the 1950s and 60s, the M1917 revolver was available through various mail order companies for bargain prices. Over 300,000 M1917 revolvers were made, with approximately 150,000 per manufacturer. The revolvers were in service until 1975, after which they were retired. As such, both variants of the revolver have their own slight differences. The Colt M1917 Revolver was essentially the same as the M1909 with a cylinder bored to take the .45 ACP cartridge and the halfmoon clips to hold the rimless cartridges in position. In early Colt production revolvers, attempting to fire the .45 ACP without the halfmoon clips was unreliable at best, as the cartridge could slip forward into the cylinder and away from the firing pin. After the First World War, M1917s became popular on the civilian and police market. Created in 1941, this field manual reveals a great deal about the M1917's design and capabilities. Intended as a manual for those charged with operation and maintenance, it details many aspects of the gun assembly, accessories and target exercises. All Rights Reserved. User Agreement, Privacy, Cookies and AdChoice Norton Secured powered by Verisign. They were produced by all the branches of service, but are generally called Army manuals. Using a phrase which appeared in many, they were "published for the information and guidance of all concerned." Field Manual FM 216, List and Index of War Department Publications, is a detailed list of the manuals that were available. Many editions of FM 216 were published during the 1940s and can be used to identify manual titles and numbers. The Library of Congress does not have a complete set of FM 216.

Those editions identified are listed further in this document under the section "INDEXES," "Field Manual FM 216, List and Index of War Department Publications ". Administrative publications include publications such as Army Regulations, Special Regulations, Bulletins, Circulars, General and Special Orders, and Pamphlets; doctrinal, training and organizational publications contain Field Manuals, Army Training and Evaluation Programs, Training Circulars, Tables of Organization and Equipment, and Tables of Allowances; and technical and equipment publications include publications such as Technical Manuals, Technical Bulletins, Supply Manuals, etc. The Library of Congress does not have a complete set of these publications, but its holdings are extensive and significant for Field Manuals up until the early 1970s. This finding aid attempts to reveal the depth and breadth of the collection available to the researcher. We will publish the inventory with updated tables as they become available to expose this information to the widest sources as quickly as we can. The collection is also of interest in terms of the care, maintenance and preservation of military artifacts. The Office of the Publication Board was organized to distribute reports and The Bibliography of Scientific and Industrial Reports BSIR was issued to announce the reports available. The federal technical reports system and National Technical Information Service has grown out of that effort. This finding aid lists those Army manuals and where known gives the alternative PB or other number by which they can be found on microfiche. This index lists those Army manuals by manual number and gives references to the citations in BSIR. Appendices also list the manuals by title and by PBnumber. However they can be very expensive to reproduce. The best way to obtain manuals is through Interlibrary Loan ILL. Libraries will generally obtain items through this system using the Library of Congress as a library of last resort.

Researchers should consult their local, college, or agency library to use Interlibrary Loan. Prints from the film are available. As such these items do not have catalog records, hence the need for the inventory, but instead are accessed through the Library of Congress Call Number U408.3.A13 with the subseries number and date given as the volume being requested followed by a subseries number and date. For example Mechanized Elements TM 210 Apr. 1941 should be requested using TM 210 Apr. 1941. As the Library of Congress may have more than one version of a manual the month and date is a very important identifier. The Federal Depository Libraries are libraries around the country to which the Government Printing Office sends copies of documents published by the Federal

Government. Most lend documents through Interlibrary Loan ILL. A listing of Federal Depository Libraries can be found through GPO Access, available at. Both make loans through Interlibrary Loan. Technical Manuals and other War Department and Department of the Army publications were identified in FM 216 List and index of publications title varies. Of these the Library of Congress has identified the following issues in its collections, by date. September 1, 1941. 128 p. U408.3.A13 FM 216b Sept. 1941 February 1, 1942. 187 p. U408.3.A13 FM 216 Feb. 1942 July 1, 1942. 263 p. U408.3.A13 FM 216 July 1942 Field manuals, firing tables, lubrication orders, mobilization training program, technical bulletins, technical manuals, training circulars. October 1, 1944. 175 p. U408.3.A12 FM 216 Oct. 1944 "This manual supersedes FM216, 1 February 1944, including C 1, 1 March 1944, C 2, April 1944, C 3, 1 May 1944, C 4, 1 June 1944, C 5, 1 July 1944, C 6, 1 August 1944 and C 7, 1 September 1944 except as to Modification Work Orders, Supply Bulletins, and War Department Pamphlets." Field manuals, firing tables, lubrication orders, mobilization training program, technical bulletins, technical manuals, training circulars.
